Updates / service / internet

- The system is equipped with a working **4G** LTE connection, which provides an uninterrupted internet connection for syncing, backup, email and remote support

- Next to 4G, both a LAN and Wi-Fi connection are available

- Software updates are applied **automatically**

- Your images are **safely** stored on connect.vet

- To connect to your wifi, **NEVER** use the wireless adapter named XDETECTOR, always use the adapter named FREE

← Wi-Fi

XDETECTOR ✗

USB-C detector charger

- The USB-C charger is **not** interchangeable between the the detector and the Windows tablet: use the USB-C charger **ONLY** for the detector, use the dedicated charger for the Windows tablet.

- The detector has a 6 hour autonomy

- The detector will go into **sleep** mode after 10 minutes and will auto **shut down** if not used for 30 minutes

- Charging the detector for 10 minutes results in 20 minutes work
